## Environmental Testing at Batemans Bay Marina - Diving and Barge Activities

Ariadne, the operator of the Batemans Bay Marina, will be undertaking additional environmental sampling and testing on 24<sup>th</sup>, 25<sup>th</sup>, 26<sup>th</sup> and 27<sup>th</sup> of May. All testing will take place between 8.30 am and 5.00 pm on these days.

The testing is required to enable studies to be completed as part of the marina redevelopment application to NSW Department of Planning. The testing is being undertaken by Ariadne's wholly owned subsidiary, Batemans Bay Marina Developments Pty Ltd. Testing is to be carried out within the marina site comprising Lot 11 DP124295 and Lot 11 DP870049.

The testing is for investigation purposes only and will be conducted in accordance with state and local government requirements.

The investigation works are being undertaken by specialists McLennans Diving Service and Synnot & Wilkinson.

The testing will involve diving on the seabed of the marina and the adjoining Clyde River as well as sampling by barge over the marina sands. Some related machinery will also be operating from the marina hard stand area. Please maintain a safe distance from all dive flags within the marina during these times.

Although some noise will be generated the testing is expected to have minimal impacts upon adjoining landowners and businesses.

Ariadne is committed to protecting and enhancing the coastal environment. These studies are necessary to ensure the proposed marina redevelopment is an environmentally responsible project.

If you have any queries about the testing works we invite you to contact the marina office on (02) 4472 9853.

Ariadne thanks you for your assistance in this matter.
