

Public Notice:

Geotechnical and Environmental Testing for Marina redevelopment

Ariadne, the proponent for the Batemans Bay Marina redevelopment is about to commence environmental testing to enable studies to be completed as part of its application to the Department of Planning. Testing on the site (comprising Lot 11 DP124295 & Lot 11 DP870049) will begin the week commencing 25th of June, ending within one month.

These works are for investigation purposes only and will be conducted in accordance with state and local government requirements.

The investigation works will be undertaken by specialists Douglas Partners and Synnot & Wilkinson.

The work will have minimal impacts upon adjoining landowners and businesses, other than the need for equipment to access particular areas of the marina.

The investigations will involve soil and water testing.

Ariadne is committed to protecting and enhancing the coastal environment. These studies are necessary to ensure an environmentally responsible project.

Ariadne looks forward to consulting with the Batemans Bay community on plans for the marina redevelopment in the near future.
